

Using Degreed as a Professional Development Tool

- Develop specific Pathways of learning that you can customize for learning groups: graduate faculty, business faculty, admissions staff, etc...
- We have developed some Pathways for remedial training, some for new training and discussed last week incorporating info on information that was presented at our summer retreat.
- You can track the learning of individuals through weekly reports that Degreed generates

Student Engagement

Faculty members will learn more about the importance of engaging students

The screenshot shows a Degreed pathway titled "Overview of Online Education" with steps: Overview of Online Education, Basic Foundations, Advanced Topic, and Applications. Below the pathway is an "Invite others to view this pathway" button with a URL and a "COPY INVITE LINK" button. To the right, an article titled "Tracking Online Education in the United States (2015)" is displayed, with a description: "This annual report by Allen & Seaman gives a comprehensive overview of the current status of online education across the country." Below the article are options to "Mark As Complete", "Save For Later", and "Recommend".

Six Components of Work-Life Balance

- You can interact with others in your school as well as others in similar fields to share resources that you've read and want to recommend. These recommendations can be emailed directly to you based on your preferences.

- Degreed is willing to customize aspects of their product to work specifically for your school. Moody was the first school to use Degreed, but they have since added additional schools and they have been very receptive to adapting to the academic world.

- It's easy to add content that you've read/listened to/watched
- You can get an update of what you're learning about based on the content of what you're engaging in.

The screenshot shows the "CONTENT" section of a Degreed profile, with the heading "Add learning, experience, and coursework to your profile." Below this are buttons for "Article", "Video", "Book", "Course", "Event", "Podcast Episode", "Experience", "Assessment", and "Create a Pathway". The "ACHIEVEMENT" section has the heading "Demonstrate skill by documenting what you have achieved." and buttons for "Skill", "Accomplishment", "Award", "Certificate", "Badge", and "Degree". At the bottom, it says "Add content from across the web with our extensions." and "Connect to providers and import completed items to your profile with integrations."

A TOOL BUILT FOR HOW PEOPLE REALLY LEARN

Source: Bersin by Deloitte, 2014 Corporate Learning Factbook, 2/2014, Center for Creative Leadership, 1996

Traditional learning methodologies just won't work anymore with the speed of business, the global nature of our workforce and the new generation of employees.
